

STORM REPORT UPDATE STATE WEATHER CONDITIONS Friday Oct 1, 2010 at 2:15 PM

DEPARTMENT OF EMERGENCY MANAGEMENT & HOMELAND SECURITY

Peter J. Boynton, Commissioner
Betsy J.S. Hard, Deputy Commissioner

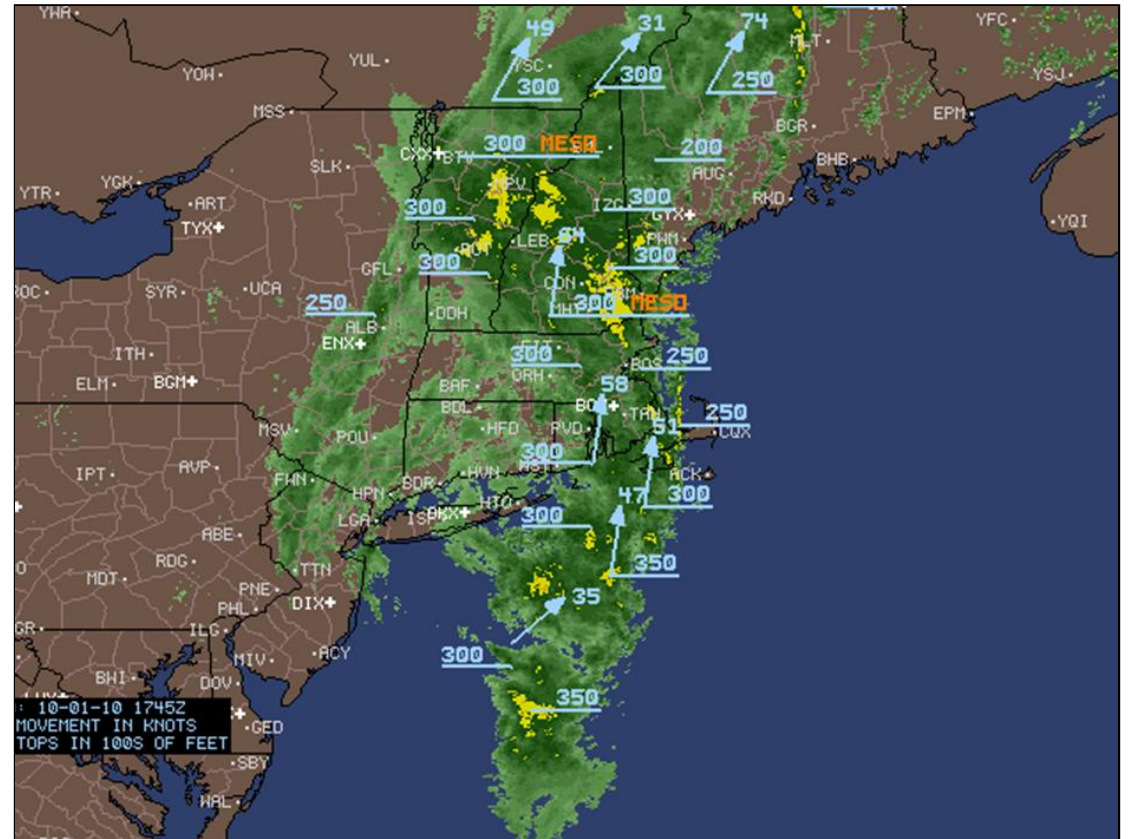

CONDITIONS IMPROVING ACROSS THE STATE... FINAL REPORT...

At 1:45 PM radar showed heavier bands of rain now in Eastern MA and Northern New England. North and Northwest winds are currently blowing at 15 - 30 MPH across the state. CL&P and UI are reporting 9,075 outages at this time. Total rainfall for this storm ranged from less than 1" in far Eastern CT up to 6.2" in far Western CT (see specific rainfall totals below). The accumulating rainfall has now tapered off to occasional showers across the state.

Showers will continue for much of the afternoon with little additional rainfall. Small stream and urban flooding is subsiding at this time. Travel in Connecticut is continuing to improve. No major issues are anticipated for the afternoon rush hour.

A total of over 65,000 customers lost power during this storm and moderate urban and small stream flooding was reported in several areas of Western and Central CT. Some property damage from high winds (homes hit by trees in Beacon Falls and Meriden) was reported and some flood damage (railroad track failure in Danbury and road failure in New Haven) was also reported.

The State Emergency Operations center is returning to monitoring mode and this will be the final report issued by DEMHS on this storm event.

WINDS ACROSS NYC & CONNECTICUT

Location	Sustained Winds	Wind Gusts	Wind Direction
JFK	22 MPH	31 MPH	N
Bridgeport	18 MPH	28 MPH	N
Danbury	12 MPH	NA	N
New Haven	9 MPH	20 MPH	N
Groton	6 MPH	NA	S
Hartford	8 MPH	17 MPH	NW
